

UROLOGY

Our board certified pediatric urologist and his team have launched an urodynamic and happy bladder program. They are prepared to provide prenatal consultations, bladder management and urinary tract reconstruction. Additionally, they will provide a multidisciplinary approach to treating patients through co-management with pediatric surgery, GI and nutrition for patients requiring bowel management.

CONDITIONS TREATED

The clinic evaluates and treats a wide variety of conditions involving the kidneys, urinary tract, bladder, and genitals, including, but not limited to:

- Anorectal malformation (ARM)
- Bed-wetting
- Cancer of the urinary and genital systems
- Chronic kidney disease (renal failure)
- Circumcision
- Daytime wetting
- Disorders of sexual development (DSD)
- Duplicated kidney
- Frequency / urgency urination
- Hernia / hydrocele
- Kidney stones
- Labial adhesions
- Testicular torsion
- Traumatic injury of the urinary system or genitals
- Undescended testicle
- Urethral stricture
- Urinary reflux
- Urinary tract infection (UTI)
- And more
